## ABOUT ME

I'm a highly motivated Computer Science student with hands-on experience in backend development, databases, data handling, and problem-solving. Passionate about building scalable applications, learning new technologies, and continuously enhancing technical and analytical skills.

## EDUCATION

|                                                                                                                                                                          |                                              |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|

## TECHNICAL APPROACH

**Languages:** Python, Java, JavaScript.

**Frontend:** HTML, CSS, JavaScript

**Backend:** Node.js, Express.js, Django

**Cloud & Tools:** Azure, Git

**Design:** Figma,Miro(UI/UX)

**Database:** MySQL, MongoDB

## PROJECTS

|                                                                                                                                                                                                                                                                                                              |                   |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Internship at Vaayusastra (Hand Gesture Controlled by Morse Code)</b> <a href="#"></a> <ul style="list-style-type: none"><li>Built a real-time Computer Vision system (OpenCV) that translates hand gestures into text commands by mapping them to Morse Code patterns.</li></ul>                         | 07/2025 – 08/2025 |
| <b>Edunet Foundation – AI &amp; Machine Learning Internship</b><br><i>A Streamlit-based PDF Summarizer that extracts and summarizes PDF content, then converts the summary into voice output in Tamil, English, and Malayalam using NLP and text-to-speech technology.</i>                                   | 12/2025 – 01/2026 |
| <b>EY Techathon : AI Report Summarizer for Pharmaceuticals</b> <a href="#"></a> <ul style="list-style-type: none"><li>Developed a Generative AI report summarization tool to quickly analyze complex pharmaceutical documents, reducing manual review time for market research by an estimated 60%</li></ul> |                   |
| <b>Odoo Amalthea Hackathon</b> <a href="#"></a> <ul style="list-style-type: none"><li>Customized and implemented the Amalthea module within the Odoo ERP system using Python ExpressJS, NodeJS and MongoDB to streamline critical business processes.</li></ul>                                              |                   |

## CERTIFICATION & ACHIEVEMENTS

- |                                                                                              |                                            |                                                             |
