Profile

Aspiring Software Engineer and IT fresher with hands-on experience in **Java Full Stack Development**, **object-oriented programming**, and **web application development**. Proficient in **Java**, **JavaScript**, **HTML5**, **CSS3**, **SQL**, and **RESTful API development**. Experienced in **front-end and back-end integration**, **database design**, and **CRUD operations**. Strong skills in **problem-solving**, **data analysis**, **debugging**, **performance optimization**, and **software development lifecycle (SDLC)**. Passionate about building **scalable**, **secure**, and **high-performance applications** with a focus on **user experience** and **system efficiency**.

Education

Higher Secondary

St. Joseph's Convent Higher Secondary School

Percentage

86

B.E in Computer Science Engineering

Prince Shri Venkateshwara Padmavathy Engineering College
semester

2023 - 2027

CGPA - 8.42 till 5th

Skills

- | | | | |
|---------------------------|------------------------|----------------------|--------------------------|
| • Java Development | • Neo4j | • Python Programming | • SQL and NoSQL database |
| • C++ programming | • Git and GitHub | • Web Development | • UI/UX design |
| • Effective Communication | • Full-stack debugging | • Project management | |

Professional Experience

Java Full Stack Developer Intern-Feather softwares

06/2025 – 07/2025

- Developed responsive web application using Java, Spring Boot and Angular, following industry best practices
- Collaborated via Git, participated in code reviews and assisted in debugging and issues resolution

Data Analyst Intern -Rickey Verse

- Here I analyzed and interpreted complex data sets, generated insightful reports and contributed to data-driven decision-making processes to optimize business performance

Projects

Brain Tumor Detection Using Machine Learning

- Developed a deep learning model using CNNs to detect brain tumors from MRI scans with 96% accuracy, utilizing TensorFlow and OpenCV for image preprocessing and model training.
- Performed data augmentation and normalization to improve generalization; implemented Grad-CAM for model interpretability by visualizing tumor localization.
- Published findings in a project report focusing on sensitivity and precision in detecting Glioma, Meningioma, and Pituitary tumors.
- Built a Streamlit web application to allow users to upload MRI images and receive real-time predictions with heatmap overlays.

Steganography Project FULL STACK

- Developed a **Python-based steganography system** to securely embed and extract data in **PNG/JPEG images**, ensuring **image quality preservation**, **data integrity**, and **AES-256 encryption/decryption** via **Flask/Django REST APIs**.
- Deployed **Dockerized microservices** using **Nginx reverse proxy** on **Google Cloud Run / Heroku / GCP App Engine**, implementing **CI/CD pipelines with GitHub Actions** for automated build, testing, and scalable cloud deployment.

Disaster Alert & Resource App

- Implemented a **machine learning model** to prioritize high-risk zones based on past data, real-time weather APIs, and user reports, enhancing alert accuracy.
- Enabled **multilingual UI** to support users in regional languages using Google Translate API, increasing reach and inclusivity.
- Integrated **Firebase Analytics** to track user engagement, disaster frequency, and volunteer response rates for data-driven improvements.

Mental Health Journal with Sentiment Analysis

- Engineered a **cross-platform mental health journaling application** using **Flutter**, **Flask REST APIs**, and **Python**, integrating **real-time NLP sentiment analysis** with **Hugging Face Transformers**, **BERT**, and **attention mechanisms**, deployed on **Google Cloud Platform (GCP)** with **scalable cloud architecture**.
- Implemented **secure user authentication (JWT)**, **data encryption at rest**, **mood tracking**, **daily affirmations**, **custom journaling workflows**, and **sentiment analytics dashboards** using **data visualization**, **time-series analysis**, and **Flutter charts**, enhancing **user engagement**, **privacy**, **model interpretability**, and **emotional well-being insights**.

Certificates

- Neo4j certified Neo4j Graph Data Scientist
- TECH Expo IIT Guwahati-Winner
- ICON'26 Shaastra International Conference, IIT Madras-Finalist
- Techpreneur | Udyamitsav'26, IIT Jammu -Finalist
- Vishwakarma Awards 2025(2 projects)-Semi Finalist
- Mind The Product || ESummit'26 | IIT Roorkee -Finalist
- Neo4j Certified Neo4j Developer
- Winner & Finalist of 10+Hackathons in IITs
